

Vincenzo Affinita holds a master's degree in Industrial Biotechnology from Università della Campania Luigi Vanvitelli (formerly Seconda Università degli Studi di Napoli) and an MBA from London School of Business and Finance. Since 2010 he has been working within the life science and medical device industry partnering with private and academic research organizations. Today, he works for CELLINK Bioprinting empowering researcher "to create the future of healthcare".

CELLINK by releasing the first universal bioink in 2016, democratized bioprinting' cost of entry for researchers around the world and played a major role in turning the then up-and-coming field of 3D bioprinting into the thriving industry it is today.
