

Dr. Alberto Rainer is Associate Professor of Industrial Bioengineering at Università Campus Bio-Medico di Roma, Rome, Italy. He is also Associate Scientist at the Institute of Nanotechnology, National Research Council in Lecce, Italy. He holds an MS degree in Materials Engineering and a PhD in Materials for Energy and the Environment.

He is board member of Centro 3R (Italian inter-university center for the promotion of the 3Rs in teaching and research), and treasurer of the Italian Organ-on-Chip Society.

His research interests are in the field of advanced in vitro models using biofabrication techniques.
