

Dr. Elia Bari graduated in Pharmacy with honors in July 2016 and obtained a PhD in Chemical and Pharmaceutical Sciences in February 2020 at the University of Pavia. Since February 2022, he has been an assistant professor (RTDA) at the Department of Pharmaceutical Sciences at the University of Piemonte Orientale. His research activity is in the field of advanced therapies and regenerative medicine, with particular emphasis on the secretome and extracellular vesicles released by Mesenchymal Stem Cells and the ways to formulate them into a new medicinal product.
