

Emidio Camaioni received, in 1992, his degree (cum laude) in Chemistry and Drug Technologies at the University of Camerino. In 1997 he got his PhD in Chemistry of Drug. In 1999 he became Assistant Professor and, in 2005, Associate Professor in Medicinal Chemistry at the Department of Pharmaceutical Sciences, University of Perugia (Italy), where he is currently working. His research interests span in various medicinal, analytical and computational chemistry fields. More in detail: i) design and synthesis of heterocyclic derivatives as enzyme inhibitors, receptor ligands, neuroprotecting or anticancer agents; ii) development and chemical modifications of innovative and bio-compatible nanomaterials. He is author of about 100 papers published in international journals.
