

Piero Del Boccio is Associated Professor in Biochemistry at the Department of Pharmacy, "G. d'Annunzio" University, Chieti, Italy. His scientific experience has been focused on the identification of novel biomarkers in different area of Biomedical Research by proteomics and metabolomics approaches. In the last years his research has focused on Extracellular Vesicles (EVs) and their molecular characterization, through an innovative protocol, consisting in an optimized proteomics approach for the study of FACS-sorted EVs from biofluids. Such a new strategy was employed in a wide range of biomedical issues. He is currently the Head of the Proteomics and Metabolomics core Facility at Centre of Advanced Study and Technologies (CAST), "G. D'Annunzio" University: <https://www.cast.unich.it/facilities/proteomics-and-metabolomics>. His Scientific Achievements are documented by **81** publications; H-index=**28**; Citations: **2208** (source: [www.scopus.com](http://www.scopus.com), July 2022).
