

Ing. PhD Elena Fortunati got the PhD in Nanotechnology of Materials at University of Perugia where She works from 2007 till 2017. She is author of more than 150 publications (h-index 50), most of them concerning cellulose nanocrystal synthesis and their use in nanocomposites. Fortunati activities are mainly focused on biodegradable based products for different industrial application and revalorization of lignocellulosic wastes and/or resources to produced innovative and high-performing materials and devices for different final applications.
