

Antonino Foti received his master's degree in physics (2013) and PhD in Physics (2017) from the University of Messina. He joined the LPICM lab (laboratory of physics of interfaces and thin films) at the Ecole Polytechnique (FR) in 2017 as post-doc research fellow until September 2019, when he left to start a contract as researcher (RTDa) at the University Mediterranea of Reggio Calabria. Since July 2020 he is a researcher of the institute of chemical-physical processes (IPCF) of the Italian National Research Council (CNR) in Messina.
