

Dr Gaggianesi is a research fellow at the DICHIRONS Department, University of Palermo (Cellular and Molecular Oncology Laboratory, CMOL). She received her PhD in Biotechnologies for human health at the University of Piemonte Orientale. After her PhD, she was granted by a 3 years fellowship founded by AIRC/FIRC, contributing to the characterization of metastatic colorectal cancer stem cells (CSCs). Currently, her research topics include: i) characterization of the molecular mechanisms underlying targeted therapy resistance; ii) adipose tissue- CSCs crosstalk in obese breast and colorectal cancer patients, iii) molecular profiling of breast and colorectal cancer patients by multigene testing using NGS.
