

Manon owns a Ph.D. in material science from University Lille1, France since 2016. She was then a Temporary lecturer and scientist at UCCS in Lens, France. Since 2018, Manon is a scientist at the Institut Laue Langevin working for the large-scale instrument characterisation program of the IRTNanoelec. Within this framework, she performed neutron reflectometry experiments for industrial partners and since 2021, she has developed an irradiation station (TENIS), for which she is the scientist in charge. She is now conducting all thermal neutron irradiation campaigns on electronic components at the ILL.
