

Leoluca Liggio, can count on over thirty years of experience spent, since 1981, as an engineer in IBM Italy, covering several technical and marketing roles.

After the IBM experience he worked in 2013 for the KPMG Advisory Company, in Poland, as a support consultant for a project related to the Energy & Utility sector, and after those experiences he founded a private consulting company.

Furthermore, from 2012 to today, he collaborates as a consultant and program manager with the Distretto Tecnologico Sicilia Micro e Nano Sistemi S.c.a.r.l. (Catania), a public / private consortium that aims to implement research, development and higher education in the fields of micro-nanotechnology.

He can boast specific skills in team management and organization, high skills in the drafting of business plans and marketing plans, and in the management of very complex projects.

He has also been granted, since 2006, of the certification of CMI by APCO (the Association of Certified Consultants in Italy which is member of the international ICMCI institutes).
