

Cristina Maggi graduated in Energetic Engineering at the Politecnico di Milano. Since 2018 she has been in charge of the operational management and development activities of the Italian Hydrogen and Fuel Cells Association H2IT and the management of external relations with institutions, companies, research centers and trade associations. The activity includes all actions aimed at creating the political and regulatory conditions for the development of hydrogen applications in Italy, discussions with institutions, support for the drafting of sector documents and studies, coordination of technical tables and participation in conferences and seminars. In Assolombarda she is in charge of projects and initiatives aimed at companies always within the hydrogen sector within the Industry, Energy and Innovation Area. At FAST-Federation of Scientific and Technical Associations since 2017, she has managed the hydrogen area and European innovation and research projects on hydrogen and fuel cells.
