

Prof. Marta Mas-Torrent received her PhD in 2002 working at Institut de Ciència de Materials (ICMAB-CSIC) in Barcelona and at The Royal Institution of Great Britain in London (UK). Afterwards, she carried out postdoctoral research at Kavli Institute of Nanoscience, Delft (The Netherlands). In June 2007 she obtained a research position at ICMAB-CSIC and in 2022 she was awarded with the Full Professorship. She is co-author of around 180 SCI papers that have received over 5,000 citations.

Her research group is focused on the design, synthesis, and preparation of new functional molecular materials for their application in organic and molecular electronic devices. Her work ranges from fundamental studies in order to better understand materials properties to a more applied perspective aiming at developing proof-of-principle devices.
