

Luca Pagano PhD is a researcher at the Department of Chemistry, Life Sciences and Environmental Sustainability of the University of Parma. Post-doc at the Connecticut Agricultural Experiment Station of New Haven and University of Massachusetts (UMASS), Amherst. PhD in Biotechnology at the University of Parma. Main research interests: Risk assessment, ecotoxicological impact of Engineered Nanomaterials (ENMs); integrated study of plant organisms and simple eukaryotes, with particular regard to organelles functionality and molecular mechanisms, from genetics to genomics, transcriptomics, proteomics and metabolomics.
