

I did a PhD. in Chemistry specialized on surface electrochemistry (March 2012 – March 2017, UNC - Argentina). Then, I specialized in lithium batteries (postdoc March 2017- March 2019) at UNC, Argentina, and a 6-month research stay in the National Institute of Chemistry, Liubiana, Slovenia. I continued my research activities in the Polytechnic of Turin (March 2019 - to Present), in the synthesis of cathodes materials for lithium-ion batteries. Moreover, I was in charge on teaching activities in the UNC, Argentina. Through my research experience I published 8 papers, 2 chapters contributions and 1 patent. Additionally, I presented several contributions in nationals and international scientific meetings.
