

Sandro Rao received the B.Sc., M.Sc., and Ph.D. degrees in electronics engineering from the Mediterranean University of Reggio Calabria, Italy, in 2003, 2005, and 2008, respectively. He has been a researcher of electronics with the same University, since 2012, where he is involved in the design, realization, and characterization of CMOS compatible electro-optical modulators and photodetectors. His current research interests include wide-bandgap semiconductor device modeling for high temperature and high-power applications. He is author of over 100 publications in international peer-reviewed Journals or scientific international congress and continuing acts as reviewer for prestigious Journals.
