

Daniele Rocco obtained his Master's degree in Chemistry at the University of Rome "Sapienza" (Italy) in 2017. In the same University, he started his doctorate program at the Department of "Ingegneria Astronautica, Elettrica ed Energetica". His research activity is focused on the design, synthesis and characterization of new molecules in the field of Organic Electronics and on the organic electrosynthesis. During 2019 for three months he has been visiting PhD student at the Southampton University, where he worked on the Flow Electrochemistry. In 2021, he worked as post-doctoral fellow at the Department of "Scienze di Base e Applicate per l'Ingegneria". Now he is research fellow at the Department of Ingegneria Meccanica ed Aerospaziale, Sapienza University of Rome. He is co-author of 24 publications in peer-reviewed journals.
