

Dr Esther Santos, project manager in APRIA Systems SL and part-time assistant professor at the University of Cantabria, Spain. She holds a PhD in Chemical & Process Engineering with 10 years of experience in R&D projects related to environmental sustainability. Her work has focused on the development of CO₂ capture processes using membrane technology (e.g. non-dispersive absorption, supported membranes, etc.) and CO₂ electrochemical valorisation processes. She has expertise in European projects management including H2020, INTERREG, LIFE, etc. and she is responsible for the administrative management and control of economic and financial areas of the company. She can speak fluently Spanish, English, French and Portuguese.
