

Patrick Scilabra is Project Leader in the Energy Transition & Hydrogen team of De Nora Group. In his role, he coordinates activities related to European, national, and regional funded projects and supports streamlining the adoption of Water Electrolysis products. Before joining De Nora, he developed wide experience in a consultancy firm focusing on activities aimed at financing RDI projects for companies mainly in the clean-tech and energy sectors. Patrick Scilabra holds a Ph.D. degree in Chemical Engineering and Industrial Chemistry from the Politecnico di Milano and a MSc degree in Chemistry from Università degli Studi di Parma, in addition to several research experiences abroad and contributions to national and international scientific meetings and journals.
