

Rajandrea SETHI is Full Professor at the Department of Environment, Land and Infrastructure Engineering (DIATI) of the Politecnico di Torino. He is Head of the Groundwater Engineering Group and he is member of the Steering Committee of the Technology Transfer Office and of the Information Technology Committee of the Politecnico di Torino. His studies focus on environmental monitoring and modelling, flow and contaminant transport, colloidal transport in porous media, groundwater monitoring, development of novel environmental reclamation technologies, and environmental nanotechnologies. He is author of more than 70 journal articles and of the textbooks: "Ingegneria degli Acquiferi", "Groundwater Engineering" – both published by Springer – and "Nanomaterials for the Detection and Removal of Wastewater Pollutants" published by Elsevier.
