

Tiziana Tosco is Associate Professor at the Department of Environment, Land and Infrastructure Engineering, Politecnico di Torino. Her research activities are mainly devoted to groundwater remediation and protection (with a specific focus on the development of nanoparticle-based in-situ remediation techniques for contaminated aquifers, at both laboratory and field scale), colloid transport modeling, human health risk assessment applied to nanomaterials, quantification and mitigation of the environmental impacts of agrochemicals (including the development of green nano-formulations for pesticides). She is author of 46 peer-reviewed papers, 3 book chapters and more than 80 conference contributions. She co-tutored 40+ Master students and 7 PhD students. Website: www.polito.it/groundwater
