3rd NANO belongs to a series of scientific international conferences aimed at providing a forum for discussing the most recent development of the research in *Nanoscience*, *Nanotechnology* and *Nanobiotechnology*.

3rd NANO 2022 Conference, organized by the nM²-lab (CNR-ISM & UniGe-DCCI), will focus on the latest advances in modeling, synthesis and characterization of (multi)functional nano-materials, nano-composites and multiscale systems with magnetic, electric and optical properties and their applications in different fields including biomedicine, energy, life science and electronics.

The Conference will include invited speakers, regular oral and poster communications.

TOPICS

- (MULTI)FUNCTIONAL NANOMATERIALS, NANOCOMPOSITES AND MULTISCALE SYSTEMS
- MAGNETIC, TRANSPORT AND OPTICAL PROPERTIES
- THEORETICAL MODELING AND COMPUTER SIMULATIONS
- ADVANCED DESIGN AND FABRICATION METHODS
- ADVANCED CHARACTERIZATION TECHNIQUES
- APPLICATIONS: BIOMEDICINE, ENERGY, LIFE SCIENCE, ELECTRONICS
